FIRMICORE · MAINTENANCE MANAGEMENT

Plans & limits

Prices in USD per company per month. Yearly billing = pay 10 months, get 12.

Proposed — effective for new customers.
Existing customers keep current terms for 12 months.

	Starter $25/mo $250 / year Small workshops getting started	MOST POPULAR Growth $89/mo $890 / year Plants with teams, contractors & training	Factory $379/mo $3,790 / year Large plants, audits & analytics	Enterprise from $1,499/mo annual contract Everything, unlimited, multi-plant
PEOPLE				
Full users (admin, manager, supervisor, technician, store, HR, safety)	**3**	**10**	**40**	**Unlimited**
Light users (floor operators, trainees)	**10**	**50**	**250**	**Unlimited**
MAINTENANCE RECORDS				
Machines / assets	**15**	**75**	**400**	**Unlimited**
Work orders per month	**60**	**400**	**2,500**	**Unlimited**
Breakdown reports per month	**40**	**300**	**2,000**	**Unlimited**
Active PM schedules	**30**	**400**	**3,000**	**Unlimited**
INVENTORY & PURCHASING				
Inventory parts	**100**	**2,000**	**10,000**	**Unlimited**
Purchase orders per month	**20**	**150**	**1,000**	**Unlimited**
Auto PO emails · low-stock alerts · QR scan	—	✓	✓	✓
TEAM MODULES				
Contractors registered	—	**25**	**250**	**Unlimited**
Contractor safety-training invites / month	—	**30**	**300**	**Unlimited**
Training modules (authored)	—	**25**	**250**	**Unlimited**
Shift handover · Safety cases & work permits	—	**✓ no record cap**	**✓ no record cap**	✓
DATA, FILES & AI				
File storage	**5 GB**	**50 GB**	**500 GB**	**Unlimited***
Largest file	15 MB · no video	50 MB	100 MB (video 200 MB)	Platform max
AI credits per month (1 = plain call, 6 = web-research call)	**20**	**150**	**800**	**Unlimited***
Dashboard & analytics history window	**6 months**	**24 months**	**60 months**	**All**
Scheduled reports	—	**5**	**50**	**Unlimited**

Records are never deleted when a window or limit is reached — older data stays stored; dashboards load the window shown. At a storage limit new uploads pause until space is freed or added. *Enterprise is unlimited under fair use (review at 2 TB stored or 5,000 AI credits per month).

What each plan includes

Features by plan, add-ons and trial.

	Starter	Growth	Factory	Enterprise
Machine registry with QR codes · breakdown reporting · work orders · PM scheduling	✓	✓	✓	✓
Inventory & parts catalog · stock movements	✓ small	✓	✓	✓
13 interface languages incl. Sinhala & Tamil · installable phone web app	✓	✓	✓	✓
Core dashboard · reports with PDF export · staff requests	✓	✓	✓	✓
AI root-cause suggestions & translation (within credits)	✓	✓	✓	✓
Contractor management & contractor safety cards	—	✓	✓	✓
Shift handover · training workspace · safety workspace	—	✓	✓	✓
Scheduled reports & Google Sheets export	—	✓	✓	✓
MOE / OEE analytics	—	—	✓	✓
Audits (TPM, 5S, contractor) · Kaizen · evaluations · triage builder	—	—	✓	✓
Multi-plant management	—	—	—	✓
Support	Email	Email, priority	Priority + onboarding call	Named contact

Add-ons (any paid plan)

- Extra full user — **$10** / month each
- Extra 10 light users — **$5** / month
- Extra 25 machines — **$10** / month
- Extra 1,000 inventory parts — **$10** / month
- Extra 50 GB storage — **$6** / month
- 500 AI credits — **$25**

Free trial & billing

- **14-day free trial**, no card — all modules except multi-plant; 1 GB storage, 20 AI credits, Starter record limits.
- Monthly or yearly (yearly = 2 months free).
- Limits are checked live; at a limit the user sees an upgrade prompt, nothing is lost.
- Enterprise is invoiced by Lumora; unlimited under a fair-use clause.

Market price benchmarks

Compiled 16 Oct 2026 from vendor pricing screenshots you supplied and third-party review sites (vendor pages could not be opened from our environment). Sources disagree — confirm before quoting.

Vendor	Model	Free tier	Entry	Mid	Top	What they gate / published limits
MaintainX	per user	Basic (2 repeating PMs, 1-mo analytics)	Essential $20 yr / $25 mo	Premium $65 yr / $75 mo	Enterprise custom	Parts, POs, meters, API at Premium; multi-site/SSO at Enterprise; unlimited requesters; no storage limit published
UpKeep	per user	Lite (3 techs, one source)	$20–24	$45–55	$75 / custom	Starter caps requesters (5); parts & POs from Professional; SSO/API top tier
Limble	per user	none (disputed)	Standard ≈ $28	Premium+ $55–79	Enterprise custom	1 location on Standard; spare parts, POs, offline, API at Premium+; unlimited assets/WOs
Fiix	per user	Free (25 active PMs)	$45	$75	custom	Free keeps unlimited WOs & requests
Hippo CMMS	per user	—	$35	$55	$75	Third-party listing; setup fee mentioned
eMaint / MicroMain	per user	—	$69 / $89	$85	$120	Enterprise-style; listings conflict with "get a quote"
MaintenancePro (screenshot)	per user	—	$30	$50	$80	Operators included (10 / 20 per full user); 50 / 500 / unlimited vehicles; parts, POs, barcodes at $50; automations, GPS, SSO at $80
FixAhead (screenshot)	whole bill	Free: 2 users or 50 assets · 2 GB	—	Pro $99 (10 users or 100 assets)	—	Unlimited storage on Pro; +$10/user or +$10 per 10 assets; annual −33%
Atlas CMMS	flat / open source	Self-hosted free, unlimited users	Cloud from $10 flat (or $15/user)	—	Commercial licence	Unlimited requesters & viewers on cloud
Local: Facilitypal (Sri Lanka) · ReliaMaint (India)	per account	ReliaMaint: free version	from $15 / month	scales with users	—	Thin listings, no published rupee price sheets

Reading the market

- Per-user pricing dominates: entry **$16–30**, mid **$45–75**, top **$75–120+** per user per month.
- Whole-company flat pricing exists at the low end (FixAhead $99, Atlas $10–15) and is what South Asian SMEs find easiest to buy.
- Free tiers are common, always capped on PMs, assets, users or storage — never on features.
- Inventory/POs, API, SSO and offline are the usual upsell gates.
- Nobody we found publishes a storage cap except FixAhead (2 GB free, unlimited Pro) — our storage limits must look generous.

Where our price list lands

- Starter $25: 3 full + 10 light users. Per-user tools charge ≈ $60 for 3 users; local floor is ≈ $15.
- Growth $89: below FixAhead's $99 and a fraction of 10 × $45–75 per-user bills ($450–750).
- Factory $379: 40 × $50–65 = $2,000–2,600 elsewhere.
- Enterprise from $1,499: ≈ 15–20 full users at top per-user prices, but unlimited users.

Features & data limits vs the market

FirmiCore column is from our code; the market column is where reviewed vendors place the same feature.

Feature	FirmiCore today	FirmiCore plan (proposed)	Typical market placement
Work orders, PM scheduling, QR, breakdown reporting	Built	All plans	Entry tier (free tiers cap PMs/assets)
Inventory, POs, auto-PO email, low-stock	Built	Small catalog Starter; full Growth+	Mid tier (MaintainX Premium, UpKeep Professional, Limble Premium+)
Meter / condition-based PM triggers	Built	All plans	Mid tier (MaintainX Premium)
Contractor management & safety cards	Built	Growth+	Rarely bundled in CMMS entry tiers
Safety cases, permit-to-work, training, shift handover	Built	Growth+ (no record cap)	Not found in reviewed price sheets — differentiator
Audits (TPM/5S/OEE), Kaizen, MOE analytics	Built (TPM/5S module not routed)	Factory+	Advanced analytics at upper tiers
AI root-cause & translation	Built (Claude)	All plans, credit-limited	AI copilots mostly Enterprise-only
13 languages incl. Sinhala, Tamil, Hindi, Urdu	Built (completeness unverified)	All plans	Mostly English + major EU languages — regional advantage
Multi-plant management	Built	Enterprise	Enterprise tier
Gaps: native iOS/Android apps · offline mode · SSO · public API · IoT integrations	Not built (installable web app only; no offline persistence configured)	Do not advertise	Offline at Limble Premium+; API/SSO at top tiers; native apps at all

Data-usage limit	What the market publishes	Our approach
Work orders	Almost always unlimited (even Fiix / MaintainX free tiers)	Monthly caps set ≈ 4–6× typical use (≈ 2–4 WOs per machine per month, an assumption) so normal plants never hit them; Enterprise unlimited. Could be changed to soft "fair use" if it hurts sales.
Assets / machines	50 / 500 / unlimited (MaintenancePro); 50–100 (FixAhead); unlimited at Limble & MaintainX	15 / 75 / 400 / unlimited — a value limit, machines are cheap to hold
Users & requesters	Per paid user; requesters / viewers usually free and unlimited	Light-user pools (10 / 50 / 250) mirror free requesters but keep a ceiling
Storage	Mostly unpublished; FixAhead 2 GB free, unlimited Pro	5 / 50 / 500 GB — generous at ≈ $0.035 per GB per month; photos to be compressed
Inventory parts	Gated by tier, rarely counted	100 / 2,000 / 10,000 — protects whole-catalog read cost
AI	Enterprise-only copilots; credits rarely published	Credits per plan (20 / 150 / 800) — our biggest variable cost

How we compare

Competitor figures from their public pricing pages (screenshots supplied) and third-party summaries; verify before quoting.

	MaintenancePro (fleet)	FixAhead	Others (3rd-party sources)	FirmiCore (proposed)
Pricing model	Per user: $30 / $50 / $80; "operator" users included per full user (10–20)	Free + Pro $99 *whole bill*; charged the cheaper of per-user or per-asset model	Per user: MaintainX $20 / $65, Fiix $45 / $75, UpKeep $24 / $55, Limble $28+	Flat plan price with seat pools; add-ons priced per unit
Entry tier	$30/user · 50 vehicles · single location	**Free forever**: 2 users + unlimited assets, or 50 assets + unlimited users · 2 GB · unlimited work orders	Free tiers on MaintainX / Fiix (limited)	Starter $25: 3 full + 10 light users · 15 machines · 60 WO/mo · 5 GB
Mid tier	$50/user · 500 vehicles · multi-location · parts inventory, POs, barcoding, e-signatures	Pro $99: 10 users or 100 assets (unlimited of the other) · **unlimited storage** · +$10/user or +$10/10 assets · annual −33%	—	Growth $89: 10 full + 50 light users · 75 machines · 400 WO/mo · 50 GB · contractors, training, safety, shift handover
Top tier	$80/user · unlimited · automations, GPS, SSO	Custom / demo	Enterprise: custom	Factory $379 · Enterprise from $1,499 (unlimited)
Annual discount	≈ 2 months free	20% quarterly, 33% annual	Typically 15–20%	2 months free (≈17%)

Same customer, monthly bill	FirmiCore	FixAhead Pro	MaintenancePro	MaintainX (full users only)
Small shop: 3 full + 10 operators, 15 machines	**$25**	$0 (Free tier)	$90	$60 (Essential)
Plant: 10 full + 50 operators, 75 machines	**$89**	$99	$500	$650 (Premium)
Large plant: 40 full + 250 operators, 400 machines	**$379**	≈ $399 (asset model)	≈ $2,000	≈ $2,600 (Premium)

What this tells us

- At the bottom, FixAhead's free tier beats any paid starter on price; we win only on breadth (9 roles, safety, training, AI), so keep Starter cheap ($25; local listings start near $15) and tightly limited rather than free.
- At Growth we are $10 under FixAhead Pro but they offer unlimited storage and work orders; our edge is the modules they do not have.
- Against per-user tools we are 60–85% cheaper for plants with many operators — lead with the operator seat pool.
- Their seat-ratio idea (operators per full user) maps to our light-user pools; their "cheaper of two models" is attractive but harder to meter — not adopted.

Caveats

- Competitor prices change; MaintainX/Fiix/UpKeep/Limble figures come from third-party comparison sites that disagree.
- No Sri Lanka / South Asia CMMS price data was found — pilot with real prospects; consider LKR/INR prices.
- MaintenancePro: Basic ($30) for the small shop, Premium ($50, 500 vehicles) for the others, operators included. MaintainX counted for full users only at annual list ($20 Essential / $65 Premium); requesters are usually free there.

INTERNAL — DO NOT PUBLISH

Why these limits & unit economics

Limits sit where usage creates cost (reads, files, AI), not on features that cost nothing to hold.

Where the system spends money (from the code)

- **Reads:** 215 live listeners; dashboards rebuild from full history. Several inventory screens (stats, company parts, low-stock alerts, supplier picker) subscribe to the **entire parts catalog** — cost grows with parts × users. → parts and history-window limits.
- **Machines** are paginated (cheap to hold) — the machine cap is a value limit, not a cost limit.
- **Work orders / breakdowns / PM:** each lifecycle fires several triggers and photos; caps also bound media volume and trigger fan-out.
- **Files:** permanent, create-only, uncompressed photos; videos up to 500 MB. → storage + file-size limits.
- **AI:** Sonnet 5 $2/$10 per MTok; web search $10 per 1,000. Only per-user/hour and per-company/day caps today.
- **Not capped on purpose:** safety cases, work permits and shift handovers — compliance records.

Unit economics at full use (USD / month)

Plan	Price	Est. cost	Margin	If reads ×3
Starter	$25	$4.1	**84%**	73%
Growth	$89	$16.2	**82%**	68%
Factory (10k parts)	$379	≈ $89	**≈ 77%**	≈ 56%
Enterprise (fair-use ceiling)	$1,499	$331	**78%**	64%

Cost = storage $0.026/GB + downloads $0.15/GB (4%/mo) + Firestore reads $0.06/100k (20k/full user/day, 4k/light user/day, plus whole-catalog inventory listeners) + AI $0.02/credit + $1–10 fixed + Stripe 3.4% + $0.30. Cloud Storage and Firestore rates are from search results of Google's pricing pages; read volume, photo size (16 MB/WO) and AI cost per call are **assumptions to measure**.

Engineering that raises margin (so limits can loosen later)

- Replace whole-catalog parts listeners with paginated / aggregated reads → Factory part cap can move 10k → 25k+.
- Pre-aggregate dashboard data (`analytics_monthly/daily`) instead of scanning history.
- Compress work-order and breakdown photos on upload (≈ −80% storage).
- Route plain AI calls to Haiku 5.5 (~20× cheaper); keep Sonnet for web research.

Decisions needed before launch

- Approve prices ($25 / $89 / $379 / from $1,499) and the limits above.
- Approve new feature gates: audits, Kaizen, evaluations, triage builder, scheduled reports (currently open to all plans).
- Free tier? Not recommended yet; spec if wanted: 1 full + 2 light users, 5 machines, 20 WO/mo, 500 MB, no AI (≈ $0.5/mo each).
- Churned-account purge after 90 days (irreversible; needs a terms notice).
- Enterprise SSO / public API / SLA are **not built** — do not advertise.
