

MAINTENANCE MANAGEMENT PLATFORM

Keep every machine running. Keep every team in sync.

FirmiCore brings breakdowns, work orders, preventive maintenance, spare parts, safety and training into one simple platform — for every person on your plant floor.

Maintenance shouldn't run on **paper, chat groups and memory.**

When breakdowns are reported by phone call, spare parts are counted by hand and PM schedules live in a spreadsheet, downtime grows and knowledge walks out the door with every shift change.

Without a system

- Breakdowns reported late or lost
- Repeat failures nobody tracks
- Missed preventive maintenance
- Parts out of stock at the worst time
- No clear view of machine health

With FirmiCore

- Every breakdown logged in seconds
- Full history for every machine
- PM scheduled, assigned and tracked
- Stock levels and purchase orders in one place
- Live dashboards for every role

One platform. Nine roles. One version of the truth.

From the floor operator reporting a fault to the plant manager reviewing performance, everyone sees exactly what they need — and nothing they don't.

Everything your maintenance team needs, built in.

1

Machine Registry

A complete asset register with QR codes, maintenance history and an automatic 0–100 machine health score.

2

Breakdowns

Report, acknowledge, assign and close faults with severity levels, photos and root-cause analysis.

3

Work Orders

Create, assign and track jobs through to supervisor sign-off, with technicians' own task lists.

4

Preventive Maintenance

Recurring schedules, a calendar view and compliance tracking so planned work doesn't slip.

5

Inventory & Parts

Spare-parts stock, purchase orders and store-keeper tools that keep critical items available.

6

Contractors

Manage external jobs and contractor performance alongside your in-house team.

7

Shift Handovers

Structured handover notes so nothing is lost between shifts.

8

Guided Troubleshooting

Build step-by-step triage flows so any operator can diagnose common faults safely.

GO FURTHER

Performance, safety and people — in the same system.

Analytics & Reports

Dashboards for breakdowns, work orders, PM and contractor jobs, plus exportable reports for management.

OEE

Track Overall Equipment Effectiveness to find where availability, performance and quality are lost.

Kaizen & Audits

Capture improvement ideas and run TPM, 5S, OEE and contractor audits in one unified module.

Safety

Safety cases for incidents, near-misses and hazards, plus permit-to-work and safety training sessions.

Training & Certificates

Training modules, trainee programmes and certificates so skills are recorded and visible.

Instant Notifications

Device and in-app alerts keep the right people informed the moment something needs attention.

Secure by design

Every company's data is isolated, and access is controlled by role — enforced on the server, not just on screen. Available in multiple languages.

The right view for the right person.

Role	What they get
Admin	Full control: users, settings, billing and every module.
Plant Manager	Manager dashboard, analytics, OEE and oversight of the whole site.
Supervisor	Assign work, sign off jobs, manage PM, shifts and handovers.
Technician	Their own work orders, breakdowns and PM tasks — on any device.
Store Keeper	Parts, stock levels and purchase orders.
HR Officer	Training, evaluations, compliance and contractor oversight.
Safety Officer	Safety cases, permit-to-work, safety training and company-wide visibility.
Floor Operator	Report a breakdown fast and follow guided troubleshooting.
Trainee	A structured learning programme with modules and certificates.

GET STARTED

Up and running in three steps.

1

Create your company

Sign up and set up your site in minutes — no installation required.

2

Invite your team

Add users and give each person the role that fits their job.

3

Register machines & go

Add your assets, print QR codes and start logging work straight away.
