FirmiCore LinkedIn Marketing Plan

4 weeks, 12 posts | 20 Oct - 12 Nov 2026 | Times in Sri Lanka time (UTC+5:30)

Already posted (excluded): QR breakdown, automation / no paper logs, work orders, pricing, triage, certifications, analytics.

Target leads: Plant managers, maintenance heads, COOs / factory owners, EHS managers. Sectors: apparel, food and beverage, plastics and packaging, FMCG, auto parts, tea / rubber / cold chain. Regions: Sri Lanka, India, Bangladesh, Gulf, SE Asia (Gulf: post ~1.5 h earlier).

Cadence: Tue / Wed / Thu. Verify every feature claim against the live app and replace [bracketed] items with real numbers before posting.

Image style guide (prepend to every prompt)

Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

AI image tools garble text, so add headlines in Canva afterwards.

Lead-generation routine

- Posts 1-11 end with a question; only post 12 asks for a trial or demo. Use 'comment a keyword', then DM the link.
- Daily 20 minutes: reply to every comment within 2 hours; comment on 10 posts by target managers.
- Send 15 connection requests a day to maintenance / plant managers with a short note; no pitch in the first message.
- Turn posts 4, 7 and 11 into 5-slide carousels; post a short screen recording each Friday.
- Track weekly: impressions, comments, profile views, DMs, trials started; double down on the top 3 posts.

Post 1: Preventive maintenance scheduling

When: Tue 20 Oct 2026, 8:30 AM | **Audience:** Maintenance managers, plant managers

Image not generated.
Use the prompt below in your image tool.

Post copy

Your PM schedule is a spreadsheet nobody trusts.

Overdue tasks hide in tab 7. The same machine gets serviced twice, and the one that breaks was never on the list.

What good PM looks like:
- Every task tied to a machine
- Due dates that assign themselves
- Overdue items visible to the whole team
- Completion history you can show an auditor

How many overdue PM tasks do you have right now? Honest number in the comments.

#PreventiveMaintenance #Maintenance #Manufacturing

Image prompt

A giant calendar with glowing teal check marks, one amber warning flag on a machine icon, a small gear clock beside it. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 2: Shift handover

When: Wed 21 Oct 2026, 12:30 PM | **Audience:** Production managers, plant managers

Image not generated.
Use the prompt below in your image tool.

Post copy

Most downtime isn't caused at 3 PM. It's caused at 6 AM.

The night shift knows machine 4 is making a strange noise. The day shift finds out when it stops.

A shift handover should be a record, not a verbal "all good."
- What broke
- What's still open
- What the next shift must watch

Do your shifts hand over on paper, WhatsApp or memory?

#ShiftHandover #Manufacturing #Operations

Image prompt

Two workers passing a glowing baton shaped like a clipboard at a factory shift-change, a sun on one side and a moon on the other. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 3: Inventory and spare parts

When: Thu 22 Oct 2026, 8:00 AM | **Audience:** Store keepers, maintenance managers, procurement

Image not generated.
Use the prompt below in your image tool.

Post copy

A machine stopped for 2 days. The missing part cost Rs. [Y].

This happens when stock is counted on gut feeling.

What fixes it:
- Low-stock alerts before you hit zero
- Purchase orders emailed to suppliers automatically
- Parts linked to the machines that use them

Don't find out you're out of a bearing during a breakdown.

#SpareParts #Inventory #MaintenanceManagement

Image prompt

A warehouse shelf with parts bins; one bin glows amber with an alert bell above it, and a paper-plane email flies out to a supplier. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 4: Machine health score

When: Tue 27 Oct 2026, 8:30 AM | **Audience:** Plant managers, COOs

Image not generated.
Use the prompt below in your image tool.

Post copy

Which of your machines is going to fail next?

Most plants answer with "probably the old one."

A health score from 0 to 100 per machine, built from real breakdowns, overdue PM and on-time PM, shows you:
- The 3 machines that need attention this week
- Where your maintenance hours should go
- Which asset to repair or replace

Stop managing by gut. Manage by score.

#AssetManagement #ReliabilityEngineering #Maintenance

Image prompt

A row of machines, each topped with a circular gauge: green, green, amber, one red, shown as a dashboard hologram. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 5: Contractor management

When: Wed 28 Oct 2026, 12:30 PM | **Audience:** Facility, factory and operations managers

Image not generated.
Use the prompt below in your image tool.

Post copy

You trust contractors with your most dangerous jobs. But can you see:
- Who is on site today?
- What jobs they did last month?
- Whether they've completed safety training?

Contractors are a blind spot for most plants.

We built contractor job tracking and a QR safety card. Scan it at the gate and you know who they are and what they're qualified for.

#ContractorManagement #IndustrialSafety #FacilityManagement

Image prompt

A contractor in a helmet holding a card with a QR code; a security gate scanner shows a green tick. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 6: Safety: permit to work and near-miss

When: Thu 29 Oct 2026, 8:00 AM | **Audience:** EHS and safety officers

Image not generated.
Use the prompt below in your image tool.

Post copy

"Nobody was hurt, so we didn't report it."

That sentence comes before most serious accidents.

A safe plant makes it easy to:
- Report a near-miss in 30 seconds, from any phone
- Issue a permit-to-work with precautions attached
- Lock out equipment before work starts (LOTO)

Make the safe thing the easy thing.

#EHS #WorkplaceSafety #PermitToWork #LOTO

Image prompt

A padlock and tag on a machine switch, a hard hat beside it, a small clipboard with a green permit. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 7: OEE

When: Tue 3 Nov 2026, 8:30 AM | **Audience:** Production managers, COOs

Image not generated.
Use the prompt below in your image tool.

Post copy

Your line runs 8 hours. How many of them are productive?

OEE gives one honest number built from Availability x Performance x Quality. Many plants discover their real figure is lower than they assumed. [Add your own sourced figure only if you have one.]

You can't fix what you only estimate.

What's your OEE? If you don't know, that's the answer.

#OEE #LeanManufacturing #ProductionManagement

Image prompt

A semicircle speedometer split into three glowing segments (teal, amber, white), a production line below. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 8: Kaizen and audits

When: Wed 4 Nov 2026, 12:30 PM | **Audience:** Lean and quality managers, plant managers

Image not generated.
Use the prompt below in your image tool.

Post copy

Your best improvement ideas are in the heads of your operators.

The problem is that no one has a simple place to submit them, and they never hear back.

Kaizen suggestions and shop-floor audits, tracked from idea to done, turn small fixes into steady gains and give people credit for them.

When did an operator last improve something in your plant? Did anyone write it down?

#Kaizen #ContinuousImprovement #5S #Lean

Image prompt

A lightbulb above a worker's head, an arrow looping up into a staircase, a checklist with ticks on a wall. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 9: Training and trainee programme

When: Thu 5 Nov 2026, 8:00 AM | **Audience:** HR officers, maintenance managers

Image not generated.
Use the prompt below in your image tool.

Post copy

Your most experienced technician retires next year. What leaves with them?

Structured training modules and a trainee programme turn tribal knowledge into something the next generation can learn, with progress you can see.

Skills shouldn't live in one person's head.

#SkillsDevelopment #TechnicalTraining #Maintenance

Image prompt

A senior technician passing a glowing book to a trainee beside a machine, with a progress bar floating above. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 10: Multi-language and AI root cause

When: Tue 10 Nov 2026, 8:30 AM | **Audience:** Managers with mixed-language workforces

Image not generated.
Use the prompt below in your image tool.

Post copy

Half your team reads English. Half doesn't. Your maintenance system works for one of them.

FirmiCore supports AI translation and AI-suggested root causes, so a breakdown logged in one language is understood by everyone and the real cause gets recorded.

Software should adapt to your people, not the other way round.

#AI #Maintenance #Manufacturing #Multilingual

Image prompt

Speech bubbles in different scripts (Sinhala, Tamil, English, Arabic glyphs) flowing into one glowing node shaped like a gear. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 11: Roles and multi-site

When: Wed 11 Nov 2026, 12:30 PM | **Audience:** COOs, multi-plant owners, IT

Image not generated.
Use the prompt below in your image tool.

Post copy

Your technician doesn't need to see the CFO's dashboard. Your storekeeper doesn't need to close breakdowns.

With 9 roles, each person sees what their job needs, and with multi-site you can run several plants from one place.

Control without friction.

#Operations #MultiSite #Manufacturing

Image prompt

A building with three floors, each lit in a different colour, linked by lines to a single hub. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.

Post 12: Why we built it + free trial (conversion post)

When: Thu 12 Nov 2026, 8:00 AM | **Audience:** All leads

Image not generated.
Use the prompt below in your image tool.

Post copy

We built FirmiCore after seeing maintenance run on paper, WhatsApp and memory.

One platform now holds machines, breakdowns, PM, parts, contractors, safety and analytics.

No long setup. Start a 14-day free trial, no card needed [confirm before posting].

Comment "TRIAL" and I'll send you the link, or DM me for a 20-minute demo.

#CMMS #MaintenanceManagement #SriLanka

Image prompt

A single laptop with a clean app dashboard, a small "14" calendar badge, and a golden key. Clean flat isometric illustration, deep navy (#0B1F3A) background, amber (#F5A623) and teal (#1FB5A8) accents, soft shadows, minimal, no text, no logos, 1200x1500 px.
